Specific Code Section, Rule or Standard: Chapter 2 FSD Definitions, R302			

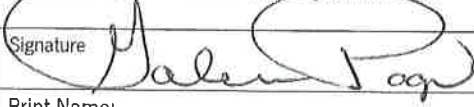

**Statement of Problem:**

Cottages 3 & 4 are separated by multiple access/utility easements. There will never be construction allowed between these two buildings. The property lines were set 4' from each building to simplify easement recording with the assumption that an assumed property line could be drawn down the center of the easement for FSD purposes, per IRC definition#3 for Fire Separation Distance. The actual distance between Cottages 3 & 4 is 17'-0", so FSD to assumed lot line would be 8'-6".

**Alternate Proposal:** (Attach additional pages, plans, drawings, technical reports, descriptions etc. to support proposal)

Allow FSD to be measured to the center line of the easement to avoid unnecessary fire walls,  
possible reduced window area and sealed attic vents. Justification is 1) that PSE, NUD & the JFC access  
easements prohibit structures within easement areas and 2) development could have been condos,  
in which case property line would have been assumed to be centered between cottages.

I certify that I am the owner or owner's agent and have the authority to request the above stated alternate materials, methods of construction, or modification in building code requirements. I understand that this request is subject to review and may be approved or denied in part or in whole. The City of Kirkland's decision will be in writing and will be specific to this request, unless otherwise noted.
